DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 10, drawn to an apparatus for measuring rotational speed of a bladed rotor, classified in class 324, subclass 174.
- II. Claims 11 - 17, drawn to a method for measuring the rotation of a bladed rotor, classified in class 324, subclass 207.21.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the rotational speed of a bladed rotor can be measured by another materially different process such as using an inductive sensor in place of GMR.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

If applicant elects group II, there is further restriction requirement.

- I. Claims 11 - 13, drawn to method for measuring the rotation of a bladed rotor, classified in class 324, subclass 207.21.

- II. Claims 14 - 17, drawn to a method for acquiring information regarding at least one of position, speed and acceleration of a moving body, classified in class 324, subclass 162.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the position, speed and acceleration of any moving body can be determined and not just of a bladed rotor. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Benoit on 11/04/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reena Aurora whose telephone number is 571-272-2263. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.
